

Testimonials

Cecelia B., Arizona

Three years ago, I fell on some ice and I broke my ankle. I am a nurse, and last year in September after a very hard shift I was diagnosed by a doctor as having *arthritis*. My ankle swelled up so much that I just couldn't get around. When you work in a very busy hospital, you've got to keep going. I was so surprised when in July, I started on the coral mineral sachets I am now able to keep up with everybody else and walk a good five miles a day! In September of this year I had a doctor re-examine my leg, and he was amazed to find that I no longer have arthritis in my ankle!

Wanda Clark, California

I was 57 years old and completely miserable. *Arthritis* had a hold of me. By October of 1995, I had both knees and a hip so sore I could not walk without a cane. Since it hurt to move, I became more inactive and depressed. On our way home after a trip, my husband and I listened to a tape of information and testimonials about coral mineral sachets. I was amazed. All I could say to my husband was, "Why don't we have some of this stuff?" As soon as we got home he ordered some. Within 5 days after I began taking it, the constant pain was completely gone. Within 8 days not only was the pain gone, but I could walk without my cane. I was also able to sleep the whole night through.

Margaret Caprye, Washington

I have had *rheumatoid arthritis* for 22 years and was recently diagnosed with *fibromyalgia*. Medications caused ulcer disease. Over a year ago I began to have so much pain I was unable to work. My daily chores became a burden. Three weeks ago I started using the coral mineral sachets. What a change! I am now pain-free. My intestinal problems are gone, and my cholesterol, which was 336, is now 273. Walking is not a chore for me now. I cannot say enough positive things about the coral. It is truly a miracle.

Amy Byrd, Virginia

I just wanted to update my condition after using the coral mineral sachets for the last few months. My energy level has lifted to the point my children have even noticed. In February 1997, I was finally diagnosed with *fibromyalgia, chronic fatigue, plantar fasciitis or extreme foot pain, and depression*. This was after years of chronic pain, excruciating fatigue, and stress related depression. A few months ago, Terry McDowell gave me a few envelopes of the coral mineral sachets and finally after trying to remember to use them every day, I began to be consistent with the coral and cut out the sodas. The pain is subsiding, and my energy is increasing. The fatigue is leaving, especially the brain fatigue, and my stamina is improving. I've worked with herbal preparations for years, and nothing worked as fast as the coral. Even my children are drinking more water, and that's a miracle in itself. Thanks for this wonderful product.

Gene Shelton, Texas

I am 63 years old and suffer with *fatigue*. In 1995 I developed a *rash* on my ankles and in the middle of my back that would not clear up. I went to the dermatologist and tried several different types of ointments, but nothing helped. I started taking the coral mineral sachets, and after two days I woke up feeling absolutely fantastic. The rash was almost completely gone in 7 days, and I have so much energy. I feel like I am 21 years old again. I am generally a very skeptical person, but I am sold on the coral and intend to get my 3 children and 5 grandchildren on it as soon as possible.

Dr. Bailey, Ohio

I was diagnosed with *multiple sclerosis* in 1978, and along with the disease came excruciating pain. In 1986, a pump was surgically installed in my abdomen, which put morphine into my spinal fluid 24 hours a day. Last year, after 9 times in the hospital and 8 surgeries, someone introduced me to colloidal minerals, which helped me in some ways but did not get alleviate the pain. When I heard about the coral mineral sachets, I was told they were a good source of ionic calcium. Within one week of taking the coral, I realized that I had no pain! For the first time in 19 years, I can work 12 hours a day without stopping to lie down.

Jesse Avalos, Virginia

I have had problems with my *stomach* for the past 15 years. I would get stomach pain, gas, and tenderness. It would last 2 to 3 days at a time and usually occur every 2 to 3 weeks. The pain got so bad that my breathing became shallow. After many tests, the doctors finally determined that the problems with my stomach were caused by stress, and in my case anxiety. After taking the coral mineral sachets for 2 days, the problems with my stomach disappeared and have never come back.

Patty A. Goff, Virginia

I am over 60 and a working grandmother. I had *aching* in my shoulders, back, and especially in my knees. After taking the coral mineral sachets for a few days, my aches have all disappeared. If I miss a day the aching comes back.

Warren L. Tillmannshofer, California

For the past 10 years, I have suffered with *arthritis* in my left shoulder and middle back. Three doctors stated I would not get better. The sad thing is I could no longer play sports with my sons. After 10 days on the coral mineral sachets, I was able to exercise without pain for the first time in 10 years, and after 24 days later I could sleep all night without pain. I now have wonderful health, energy, and can play sports with my sons!

Shari Green, Virginia

I just wanted to take a moment to let you know how the coral mineral sachets have helped me. On a scale of 1 to 10, my *PMS* was a 15. After using the coral my leg cramps were immediately relieved, and after 8 months I am thrilled to say that on a scale of 1 to 10, my *PMS* has been reduced to a 1, if that. Thanks for giving me back my sanity.
